

MOSES STEPHEN ARULRAJ S

Front-End Developer | MERN Stack Developer
8682825331 | moses.s2203@gmail.com | [LinkedIn](#)

SKILLS

FRONT-END: HTML, CSS, Bootstrap, JavaScript

MERNSTACK: MongoDB, Express.JS, React.JS, Node.JS

DATABASE: MySQL

ADDITIONAL SKILL: MS-Office, Figma

EXPERIENCE

INFOSYS LIMITED | SYSTEM ENGINEER | AUG 2022 - SEP 2024

Being a web developer, I have rich experience in front-end technologies particularly in HTML, CSS, Bootstrap, and React.js. I can develop interfaces that are visually appealing and user-friendly due to my skills. Armed with a good knowledge of SQL and MongoDB, I can quickly and smoothly handle data and integrate it with backend systems. I have also come to understand the theory and the practice of JavaScript, Node.js, and Express.js, which in turn prompts me to develop applications that are both user-friendly and time-capable on the server-sides.

PROJECT

Project Name: EMS - Event Management System (Web-Application)

Description: The Event Management System is a web application that has been designed in a very comprehensive manner to make the planning, organizing, and implementation of various events smooth whether it is a corporate conference or a social gathering. This system provides complete solutions end-to-end which includes smooth communication and effective management of the tasks that are event-related.

Technologies Used: HTML, CSS, Bootstrap, JavaScript, MongoDB, React.js, Node.js, Express.js

Accomplishment: Created user-friendly and responsive web pages for various sections. Implemented login and registration system to ensure user data protection.

Status: Project in progress; initial sections completed successfully.

EDUCATION

KAASHIV INFOTECH | SEP 2024 – PRESENT

Course: Front-End & MERN Stack

Key Technologies: HTML, CSS, Bootstrap, JavaScript, MySQL, MongoDB, React.js, Node.js, Express.js

TJS ENGINEERING COLLEGE | AUG 2018 – JUL 2022

Course: BE Computer Science Engineering
